

GSU Gateway - Mobile App Setup Guide

This guide is intended for developers and new team members who need to set up and run the GSU Gateway mobile application locally.

Branch: APRIL_MOBILE_FINAL Platform: Android, iOS, Web (React Native + Expo)

Prerequisites

Make sure the following are installed on your machine:

Tool	Version	Purpose
Node.js	v18 or higher	JavaScript runtime
npm	v9 or higher	Package manager
Expo CLI	Latest	Run the mobile app
Git	Latest	Clone the repository

Step 1: Clone the Repository

```
git clone https://github.com/jizzy123-lgtm/GS.git
cd GS
```

```
git checkout APRIL_MOBILE_FINAL
```

Step 2: Install Dependencies

```
npm install
```

Step 3: Configure the Backend URL

Open `api.js` in the root directory

Replace `<SERVER_IP>` with the actual backend server IP (via Tailscale or ngrok)

```
const BASE_URL = 'http://<SERVER_IP>:8000/api';
```

Note: The backend is hosted on a team member's local machine and shared via Tailscale VPN. Contact the backend team for the current server IP.

Step 4: Start the App

```
npx expo start
```

Then choose your platform:

Press `a` — Android emulator

Press `w` — Web browser

Scan QR code — Expo Go on physical device

Step 5: Build APK (Optional)

To generate a distributable APK for Android:

`eas build --platform android --profile preview`

Test Credentials

Role	Username	Password
Admin	admin123	password123
Staff	staff	password123
Head	head	password123
Director	director	password123

API Documentation

[View on Postman](#)

[Postman Collection](#) — import in Postman for local testing

Troubleshooting

Issue	Solution
Cannot connect to backend	Check Tailscale connection or ask backend team for current IP
Push notifications not working	Must use Expo Dev Client build, not Expo Go
Dependencies error	Delete node_modules folder and run npm install again
