I. Introduction

1.1 Purpose

This user manual provides step-by-step instructions on how to use the ManageIT mobile application. It is intended for all university personnel of Jose Rizal Memorial State University who will use the system in their respective roles.

1.2 System Description

ManageIT is a mobile application developed for the General Services Office (GSO) of Jose Rizal Memorial State University. It digitizes the process of submitting, reviewing, approving, scheduling, and tracking campus maintenance requests. The system replaces the manual, paper-based process with a centralized digital platform that provides real-time updates and push notifications to all stakeholders.

1.

1.3 Intended Audience

This manual is intended for the following users:

1. Requesters — University personnel who submit maintenance requests
2. Head — Department heads who review and approve requests
3. Campus Director — Final approver of maintenance requests
4. Staff — GSO personnel assigned to carry out maintenance work
5. System Admin — Personnel who manage user accounts and system access

1.4 How to Use This Manual

Each section of this manual is organized by role. Find your role in Section 5 and follow the step-by-step instructions provided for your specific features and responsibilities.

II. System Requirements

2.1 Device Requirements

Requirement	Minimum Specification
Operating System	Android 8.0 or higher
Storage	At least 100 MB free space

Internet Connection	Required for all features
Notifications	Must be enabled for push notifications

2.2 Network Requirements

The device must be connected to the internet or the university network

Push notifications require an active internet connection

The backend server must be running and accessible

2.3 Installation

The ManageIT app is distributed as an APK file. To install:

Download the APK file shared by your system administrator

On your Android device, go to Settings → Security

Enable Install from Unknown Sources

Open the downloaded APK file

Tap Install and wait for the installation to complete

Open the app from your home screen or app drawer

III. Getting Started

3.1 Registering an Account

Open the ManageIT app on your device

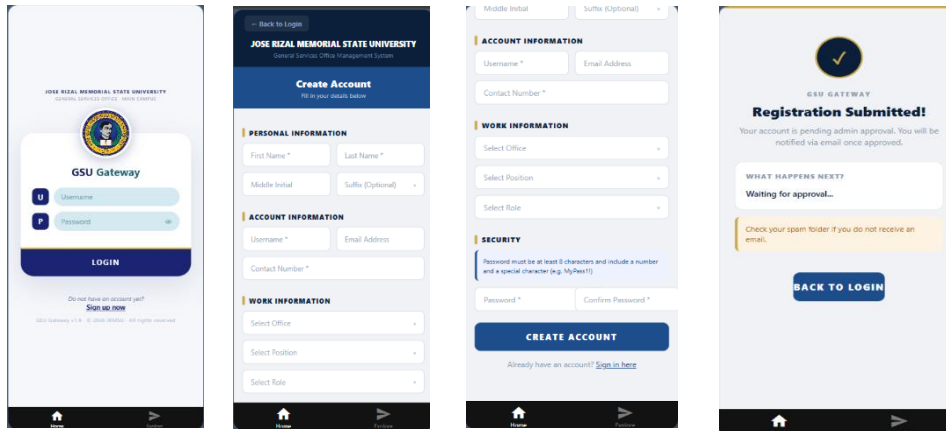

On the login screen, tap Sign Up

Fill in the required fields:

- Full Name
- Username
- Email Address
- Password
- Contact Number
- Work Information
 - Office
 - Position

Tap Create Account

Your account will remain inactive until it is approved by the System Admin. You will be notified once your account is approved.

3.2 Logging In

Open the ManageIT app

Enter your Username and Password

Tap Login

Upon successful login, you will be redirected to your dashboard

Note: The features and screens you see after login depend on your assigned role.

3.3 Logging Out

Go to the Profile tab

Tap the Logout button

Confirm the logout

You will be redirected back to the login screen

IV. Interface Overview

4.1 Bottom Navigation Bar

The bottom navigation bar is visible on all main screens and contains the following tabs:

Tab	Description
-----	-------------

Dashboard	Overview of request statistics and quick actions
Requests	View and manage maintenance requests
Notifications	View all system notifications
Profile	View and manage your account

4.2 Dashboard

The dashboard displays:

KPI Cards - Total, Pending, Approved, Done, Disapproved, and Cancelled request counts

Quick Action Cards - Shortcuts to key features based on your role

Recent Activity - Latest requests or accounts depending on your role

4.3 Status Indicators

Request statuses are color-coded throughout the app:

Status	Color	Meaning
Pending	Orange	Waiting for review
Approved	Blue	Approved, proceeding to next step
Disapproved	Red	Rejected
Done	Green	Completed
Cancelled	Gray	Cancelled by requester

4.4 Notifications

The notification bell icon shows the number of unread notifications. Tap it to open the Notifications screen.

V. User Guide Per Role

5.1 Requester

As a Requester, you can submit maintenance requests, track their status, cancel pending requests, and submit feedback on completed requests.

5.1.1 Submitting a Maintenance Request

From the dashboard, tap Submit Request

Select a Maintenance Type from the dropdown list

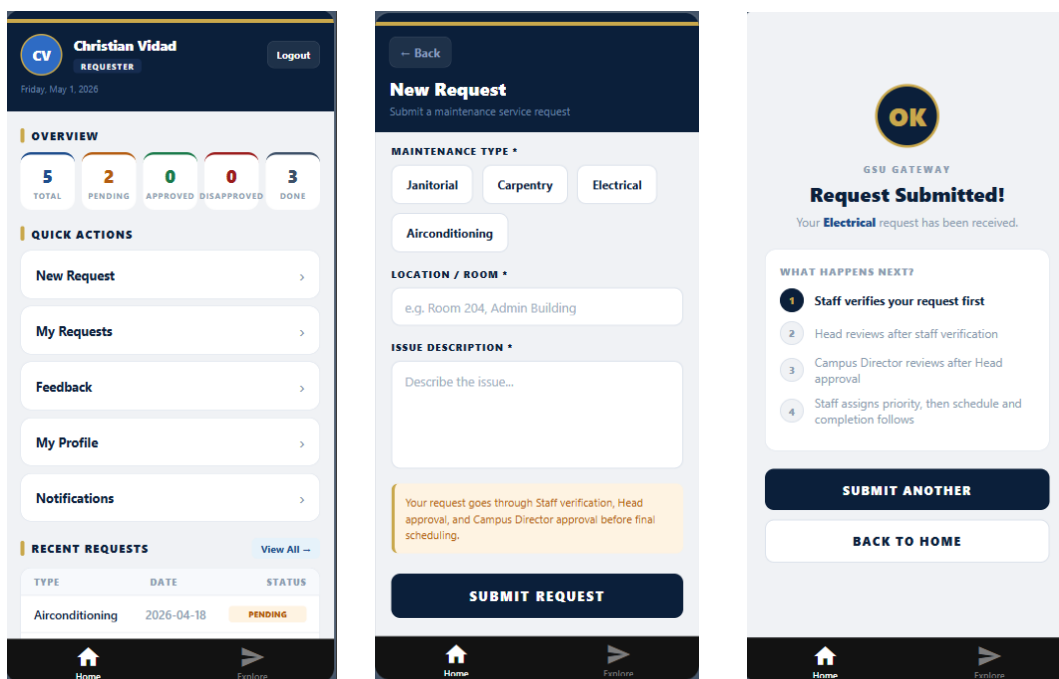

Enter the Location of the issue

Enter a Description of the problem

Tap Submit

A confirmation message will appear indicating that your request has been submitted successfully

Note: Make sure to provide a clear and accurate description and location to help the GSO staff address the issue properly.

5.1.2 Viewing Your Requests

Tap the Requests tab in the bottom navigation bar

Your submitted requests will be listed with their current status

Use the filter buttons at the top to filter by status:

All

Pending

Approved

Done

Disapproved

Cancelled

Tap on any request to view its full details

5.1.3 Cancelling a Request

Go to the Requests tab

Find the request you want to cancel (must be in Pending status)

Tap the request to open its details

Tap Cancel Request

Confirm the cancellation

Note: Only requests with Pending status can be cancelled. Approved or ongoing requests cannot be cancelled.

5.1.4 Submitting Feedback

Go to the Requests tab

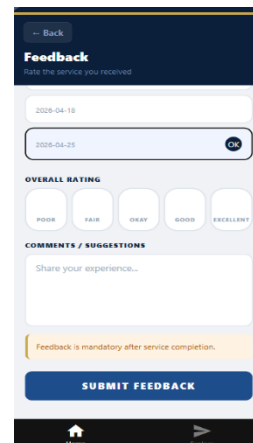

Find a request with Done status

Tap the request to open its details

Tap Submit Feedback

Enter your rating and comments

Tap Submit

A screenshot of the 'Feedback' form in the app. At the top, there is a 'Back' button and the title 'Feedback' with the subtitle 'Rate the service you received'. Below this, there are two date pickers: the first is set to '2028-04-18' and the second is set to '2028-04-30'. Underneath the date pickers is an 'OVERALL RATING' section with five buttons: 'POOR', 'FAIR', 'OKAY', 'GOOD', and 'EXCELLENT'. Below the rating buttons is a 'COMMENTS / SUGGESTIONS' section with a text input field labeled 'Share your experience...'. At the bottom of the form, there is a blue button labeled 'SUBMIT FEEDBACK'. A small orange banner above the button states 'Feedback is mandatory after service completion.'.

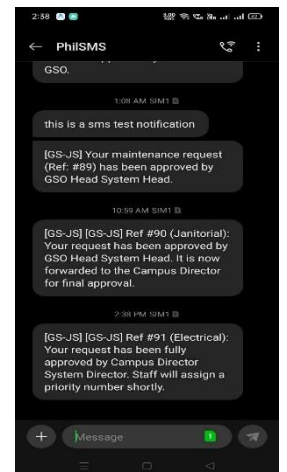

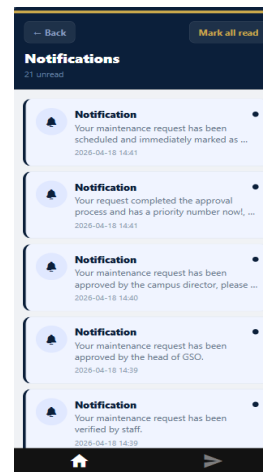

5.1.5 Viewing Notifications

Tap the Notifications tab

All notifications related to your requests will be listed

Tap a notification to mark it as read

To mark all as read, tap Mark All as Read

5.2 Head

As a Head, you are responsible for the first-level review of maintenance requests. You can approve or disapprove requests submitted by Requesters.

5.2.1 Viewing Requests for Review

From the dashboard, tap Review Requests

A list of maintenance requests pending your review will appear

Tap any request to view its full details

5.2.2 Approving a Request

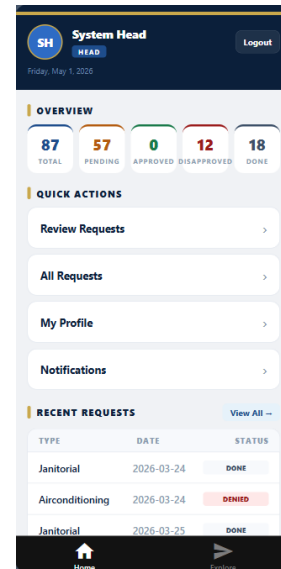

Open the request you want to approve

Review the details maintenance type, location, and description

Tap Approve

The request will proceed to the Campus Director for final approval

The requester will be notified of the update

5.2.3 Disapproving a Request

Open the request you want to disapprove

Tap Disapprove

Enter the reason for disapproval in the input field

Tap Confirm

The request will be terminated and the requester will be notified with the reason

5.2.4 Viewing the Dashboard

Tap the Dashboard tab

View the KPI cards showing the count of requests per status

Pull down to refresh the data

5.3 Campus Director

As a Campus Director, you are the final approver of maintenance requests. You can only act on requests that have already been approved by the Head.

5.3.1 Viewing Requests for Final Approval

From the dashboard, tap Review Requests

A list of requests already approved by the Head will appear

Tap any request to view its full details

5.3.2 Giving Final Approval

Open the request you want to approve

Review the details carefully

Tap Approve

The request will be forwarded to the Staff for scheduling

The requester and Staff will be notified

5.3.3 Disapproving a Request

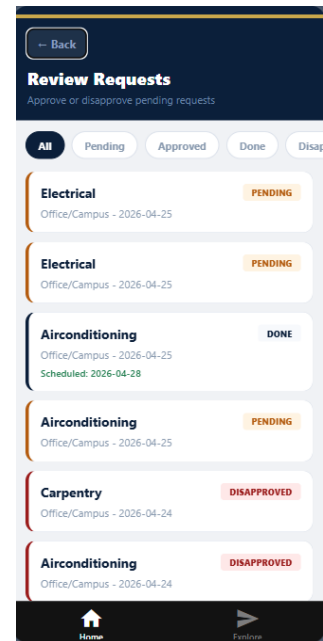

Open the request you want to disapprove

Tap Disapprove

Enter the reason for disapproval

Tap Confirm

The request will be terminated and the requester will be notified with the reason

5.4 Staff

As a Staff member, you are responsible for assigning schedules to fully approved maintenance requests and carrying out the maintenance work.

5.4.1 Viewing Approved Requests

From the dashboard, tap Review Requests

A list of fully approved requests ready for scheduling will appear

Tap any request to view its details

5.4.2 Assigning a Schedule

Open the approved request you want to schedule

Tap Assign Schedule

Select a Date from the calendar

Past dates are disabled and cannot be selected

Select a Time Slot (available from 7:00 AM to 4:00 PM)

Enter optional Notes for additional context

Tap Submit

The request status will be updated to Scheduled and all relevant parties will be notified

5.4.3 Viewing the Dashboard

Tap the Dashboard tab

View the KPI cards showing the count of requests per status

Pull down to refresh the data

5.5 System Admin

As a System Admin, you manage user accounts and control access to the system.

5.5.1 Viewing Pending Account Approvals

From the dashboard, tap Pending Approvals

A list of newly registered accounts will appear with their status

Tap any account to view its details

5.5.2 Approving a User Account

Open the account you want to approve

Assign the user's Office or Department

Assign the user's Position

Tap Approve

The account will become active and the user will be notified

5.5.3 Rejecting a User Account

Open the account you want to reject

Tap Disapprove

Enter the reason for rejection

Tap Confirm

The account will remain inactive and the user will be notified with the reason

5.5.4 Managing User Accounts

From the dashboard, tap User Management

A full list of all registered users will appear with their roles and account statuses

Tap any user to view their details

6. Troubleshooting

Problem	Possible Cause	Solution
Cannot log in	Wrong username or password	Double-check your credentials. Contact the System Admin if you forgot your password.
Account not yet active	Account pending approval	Wait for the System Admin to approve your account.
App cannot connect to server	Backend server is offline or IP has changed	Contact your System Admin to check if the backend server is running.
Push notifications not received	Notifications are disabled on the device	Go to device Settings → Apps → ManageIT → Notifications and enable them.
App is loading for too long	Slow or no internet connection	Check your internet connection and try again.
Cannot cancel a request	Request is no longer in Pending status	Only Pending requests can be cancelled.
Cannot see requests	Wrong filter selected	Make sure the correct status filter is selected or switch to "All".

APK won't install	Unknown sources not enabled	Go to Settings → Security → Enable Install from Unknown Sources.

7. Frequently Asked Questions

Q: Can I use ManageIT on an iPhone?

The app is primarily designed for Android devices. iOS support may be added in a future version.

Q: Can I submit multiple maintenance requests at the same time?

Yes. You can submit as many requests as needed. Each request is tracked separately.

Q: What happens if my request is disapproved?

You will receive a push notification with the reason for disapproval. You may submit a new request if needed.

Q: Can I edit my request after submitting?

No. Once a request is submitted, it cannot be edited. You may cancel it if it is still in Pending status and submit a new one.

Q: How will I know when my request is approved or done?

You will receive a push notification every time your request status changes.

Q: What should I do if I forgot my password?

Contact your System Admin to reset your password.

Q: Can I use the app without internet?

No. The app requires an active internet connection to communicate with the backend server.

Q: Why am I not receiving push notifications?

Make sure notifications are enabled for ManageIT in your device settings and that you have an active internet connection.

8. Glossary

Term	Definition
Maintenance Request	A formal report submitted by a university personnel describing a facility issue that needs repair or maintenance
Requester	A university personnel who submits maintenance requests through the app

Head	A department head responsible for the first-level review and approval of requests
Campus Director	The final approver who gives the last authorization before a request is scheduled
Staff	A GSO personnel assigned to schedule and carry out maintenance work
System Admin	A personnel responsible for managing user accounts and system access
Pending	A request that has been submitted and is waiting for review
Approved	A request that has been approved and is proceeding to the next step
Disapproved	A request that has been rejected by the Head or Campus Director
Done	A request where the maintenance work has been completed
Cancelled	A request that was withdrawn by the requester
Push Notification	An alert sent to the user's device to inform them of updates on their requests
Dashboard	The main screen that displays a summary of request statistics and quick actions
APK	Android Package Kit the file format used to install Android applications
Bearer Token	A security key issued upon login that proves the user is authenticated
KPI	Key Performance Indicator a measurable value used to evaluate performance, such as the count of requests per status
